

MANAGEMENT SYSTEMS POLICY

In all our activities involving standards related to Quality, Environment, Business Continuity, Customer Satisfaction, Occupational Health and Safety Management Systems, our primary commitments include:

- ❑ **Contributing to sustainable production by keeping abreast of technological developments and innovations and designing projects tailored to general needs and expectations,**
- ❑ **Meeting customer-focused expectations, ensuring continuity, preventing recurrence of complaints by identifying their root causes,**
- ❑ **Raising awareness of Quality, Environment, Business Continuity, Customer Satisfaction, Occupational Health and Safety, continuously supporting the training and professional development of our employees, and maximizing employee satisfaction,**
- ❑ **Carrying out all our activities in compliance with national and international regulatory requirements,**
- ❑ **Managing risks and opportunities effectively and continuously enhancing all our processes and the performance of our Management Systems,**
- ❑ **Identifying and preventing hazards that lead to occupational accidents and diseases at the source before they occur by considering OHS hazards and managing risks; Creating a healthy and safe working environment with the participation and support of employees and employee representatives,**
- ❑ **Ensuring efficient use of raw materials and natural resources in all our projects with an environmentally friendly management approach, and preventing pollution at the source by taking into account the life cycle and environmental aspects,**
- ❑ **Enhancing our recovery methods by reducing the amount of waste at the source and encouraging recycling,**

whereas our policy is available and accessible to all interested parties at all times.
